11. INSTALLATION
GUIDE

組裝注意事項

- (1) Front Bezel Opening must be located between View Area and Active Area.
外殼的開口要設計在可視區和動作區之間。
- (2) Elastic materials are recommended as supports to fix the Touch Panel.
建議使用彈性材質來固定觸控面板。
- (3) Support materials must be designed out of the Silver Bar.
將背膠或泡棉材質的設計不可超過銀線的內側。
- (4) Front Bezel Opening must be designed with enough gap to the Touch Panel surface in any conditions.
無論在靜態或外殼有施力的情況下，外殼和觸控面板表面之間要有足夠的空隙。
- (5) **Avoid direct bezel contact with edges of the Touch Panel after mounting.**
組裝之後應避免外框直接碰觸到面板的外側邊緣。
- ***(6) The area between the View Area and Active Area is a none-input area and also very fragile. It is absolutely forbidden to draw lines along the edge of this area because it will cause damage on the ITO layer and functional failure of the Touch Panel.**
觸控面板的可視區和動作區之間的區域為禁止輸入區,也就是脆弱區。嚴禁在此區內邊緣劃線,如此會造成薄膜的 ITO 層被破壞而觸控面板喪失功能。
- ***(7) If the applications of customer need to draw lines along the edges, please contact SPK's engineer to discuss the design of the Front Bezel.**
若客戶的使用需要在邊緣畫線,請連絡兆福工程師討論外殼的機構設計。
- ***(8) This installation guide is only for customer reference.**
此組裝方式僅供客戶參考。
